

01

INTERIOR BENCHMARK · GAC GROUP · SEPTEMBER 2026

AION — the cabins on sale

Seven battery-electric models, read as interiors: screen architecture, materials and colour, seat hardware, and the occupant each cabin is drawn for. Prices are China MSRP bands in RMB. Image frames are left empty for press photography.

ENTRY → CORE → "FASHIONABLE, INTELLIGENT, REASSURING" · SOLD ON COLOUR AND ONE BIG TILE

AION UT

B-segment hatch · BEV · China ≈¥70–105k · 4,270 mm

AION UT

dashboard, ⅓ from the driver door — cream or dusky pink trim on doors and dash

SCREENS

14.6" centre tile with an 8.8" driver cluster. Climate, mirrors and driver aids all live in the tile — almost no physical switchgear survives.

MATERIALS · COLOUR

PVC upholstery in cream or dusky pink, carried up onto the door cards and the dash. Padded dash top; soft-touch continues to the rear door cards.

SEAT · COMFORT

Manual adjustment, no comfort electronics. The party trick is that every seat folds into a full-length flat bed.

WHO IT IS FOR

First-car urban buyer, 22–28. Colour is the product — they choose the cabin before they choose the car.

AION RT

Mid-size fastback sedan · BEV · ¥85.8–123.8k · 4,865 / 2,775 mm

AION RT

dashboard straight on, plus a close-up of the suede seat facing

SCREENS

14.6" centre + 8.8" cluster. Minimalist, function-first surfacing — the dash reads as one horizontal plane.

MATERIALS · COLOUR

100% leather-wrap on every high-contact surface; suede-finished "zero-pressure" seats. The brand does not name this colourway.

SEAT · COMFORT

Suede zero-pressure seats. Rear knee room quoted at two fists behind a 175 cm driver.

WHO IT IS FOR

Value-led tech buyer cross-shopping a Model 3. Wants the sparse cabin, not the luxury cues.

AION Y PLUS

Compact SUV · BEV · ¥99.8–153.8k · refreshed 2025 · CLTC up to 610 km

AION Y PLUS

green cabin theme — screen rotated to portrait, then to landscape

SCREENS

14.6" rotating centre screen, switching between portrait and landscape on demand.

MATERIALS · COLOUR

Vegan leather. The green cabin theme is briefed as "healing" relief from urban stress — the clearest colour-as-message case anywhere in the range.

SEAT · COMFORT

Comfort-led, no massage. Wireless charging pad that actually holds a phone through a corner.

WHO IT IS FOR

Young family buying their first EV. Space per yuan is the pitch; the colour is what closes it.

AION N60

Compact SUV · BEV 610 km · ¥109.8–129.8k · 4,615 / 2,775 mm

AION N60

all three named themes side by side; zero-gravity passenger seat reclined

SCREENS

15.6" 2.5K single tile on ADiGO 6.0 — AI voice model, Huawei Nebula ecosystem, iOS and Android casting. Cluster deleted.

MATERIALS · COLOUR

Three named themes: Soft Light White, Caramel Warm Velvet, Morning Mist Cool Grey. 2.38 m² panoramic roof, 35 stowage points, 447 – 1,947 L.

SEAT · COMFORT

Zero-gravity front passenger seat as standard. Front heating, ventilation, massage and memory. Rear backrest 117–137°.

WHO IT IS FOR

Young family — priced at entry, specified like a mid. The car that dragged premium seating below ¥130k, with LiDAR standard.

AION i60

Compact crossover · BEV 650 km / EREV 1,240 km · from ≈¥115.8k

AION i60

dual-tone split across the IP; front seat cushion structure

SCREENS

14.6" on ADiGO 5.0, with GSD highway navigation assist and smart parking.

MATERIALS · COLOUR

Dual-tone split cabin with 32-colour ambient lighting. Colourway names not published.

SEAT · COMFORT

"Eight-layer comfort sofa" front seats — 8-point massage, ventilation, heating and memory.

WHO IT IS FOR

Range-anxious family buyer. One body, two powertrains, one identical cabin — the interior never tells you which you bought.

AION V

Mid-size SUV · BEV · 2nd generation 2024 · the export flagship

AION V

black standard trim vs the cream / tan leather option, same angle

SCREENS

14.6" centre runs climate, mirrors and ADAS settings; the 8.8" cluster is retained.

MATERIALS · COLOUR

Black faux leather standard; genuine leather in cream or tan for a small premium. Soft leather-like uppers, well-damped switchgear, 32-colour ambient.

SEAT · COMFORT

Comfort-led. Nine-speaker 360 W audio and a two-metre-plus panoramic roof with a powered blind.

WHO IT IS FOR

The car GAC exports. This is the cabin that has to survive European and Australian press scrutiny.

AION RAY 7

Mid-large fastback · BEV ≈700 km · expected ¥200–250k · 4,960 / 2,920 mm

AION RAY 7

any interior frame from the Chengdu unveil — this cabin is the open question

SCREENS

Not disclosed at the unveil. The exterior signature is the new illuminated AION logo inside a full-width star-ring light bar.

MATERIALS · COLOUR

Not published. Watch this one: it is the first interior of the post-rebrand AION design language.

SEAT · COMFORT

Not published.

WHO IT IS FOR

Launch model of the new "Ray" series, aimed squarely at young buyers. Huawei DriveONE 180 kW.

AION — one recipe, seven cars

WHAT THE BOARD ABOVE ADDS UP TO

- 14.6" is the floor; 15.6" 2.5K is the new step and it deletes the cluster.
- One tile runs climate, mirrors and ADAS. The switchgear does not survive.
- 32-colour ambient is assumed rather than sold.
- Materials climb PVC → vegan leather → suede with price, in that order.
- Zero-gravity seating and massage crossed below ¥130k in April 2026.
- Colour — cream, dusky pink, caramel, green — does the differentiating that surface form no longer does.

WHAT IT COSTS THEM

Every climate and mirror adjustment is a menu dive. Seven cars share one cabin grammar, so the range reads as a single product offered at seven sizes.

02

INTERIOR BENCHMARK · GAC GROUP · SEPTEMBER 2026

TRUMPCHI + HYPTEC — the cabins on sale

The comfort half of the group: six Trumpchi models plus the Hyptec flagship, read the same way. Where AION sells colour, this side of the house sells the second row. Prices are China MSRP bands in RMB. Image frames are left empty for press photography.

ENTRY → FLAGSHIP — TRUMPCHI: "FAMILY MOBILITY" · SOLD ON THE SECOND ROW | HYPTEC: PREMIUM TECH · THE GROUP'S CEILING

TRUMPCHI GS3 EMZOOM

Small SUV · 1.5T petrol · the brand's youth entry point

TRUMPCHI GS3 EMZOOM

driver-side IP and the sport seat bolster

SCREENS

12.3" centre screen — the smallest display anywhere in the group.

MATERIALS · COLOUR

32-colour ambient lighting even at the entry point. Driver-focused, sport-flavoured trim with conventional switchgear kept in place.

SEAT · COMFORT

Sport-bolstered fronts. No comfort electronics at this level.

WHO IT IS FOR

Under-30 first-car buyer who still wants an engine. The only Trumpchi not sold on rear-seat comfort.

ENTRY

TRUMPCHI GS8

Large 7-seat SUV · 2.0T 252 hp / hybrid · from ≈¥159.8k

TRUMPCHI GS8

second and third rows from the tailgate, folded and upright

SCREENS

Screen sizes are not published in English-language sources — measure these on the car.

MATERIALS · COLOUR

Conventional twin-display architecture. This is the classic family flagship the whole brand is now being rebuilt around.

SEAT · COMFORT

2+3+2. The second and third rows are what make the sale.

WHO IT IS FOR

Three-generation family. Bought on seat count, boot space and running cost, not on screen inches.

MID

TRUMPCHI XIANGWANG S7

Mid-size PHEV SUV · Mar 2025 · guide ¥209.8–249.8k · 4.90 m, five seats

TRUMPCHI XIANGWANG S7

rear seat fully reclined with the leg rest out and the ceiling screen down

SCREENS

Snapdragon 8295P on ADiGO 6.0. A 17.3" ceiling-mounted screen folds down for the rear passengers.

MATERIALS · COLOUR

Warm, light-toned luxury trim. 4.90 m long but only five seats — all the space goes into the second row.

SEAT · COMFORT

Ventilation, heating and massage: six modes at three intensities. Rear reclines to 137° on a zero-gravity "cloud" leg rest.

WHO IT IS FOR

A family SUV sold on the bench, not on the driver's seat. Buyers who would rather be driven at the weekend.

UPPER-MID

TRUMPCHI XIANGWANG S9

Full-size SUV · five- or six-seat · Huawei HarmonySpace cabin

TRUMPCHI XIANGWANG S9

six-seat layout — second-row captain chairs with their own console

SCREENS

Three screens in total, with a 12.3" cluster behind the wheel. Huawei HarmonySpace is the cabin backbone; the other diagonals are not published.

MATERIALS · COLOUR

Positioned above the S7. Choosing five or six seats changes the entire second-row architecture, not just the seat count.

SEAT · COMFORT

Six-seat form gets second-row captain chairs that recline and carry their own climate and media controls — a second cockpit, not a bench.

WHO IT IS FOR

The GS8 owner trading up, buying the Huawei cabin badge as much as the car.

PREMIUM

TRUMPCHI E9

Luxury PHEV MPV · 2023 · from ≈US\$47k · the Alphard answer

TRUMPCHI E9

second-row armrest touch pad, and the ceiling screen deployed

SCREENS

Four displays: 14.6" centre, 12.3" cluster, 12.3" front passenger and 15.6" in the ceiling.

MATERIALS · COLOUR

Light, champagne-toned cabin. Control physically moves out of the driver's seat and into the second row.

SEAT · COMFORT

2+2+3 with second-row captain chairs, each carrying its own 5" touch pad in the armrest to drive its own seat.

WHO IT IS FOR

Chauffeur-driven business use, cross-shopped directly against the Toyota Alphard.

LUXURY

TRUMPCHI M8 XIANGWANG

Full-size MPV · 2026 model year · the brand's ceiling

TRUMPCHI M8 XIANGWANG

welcome projection at the door; third row powered flat

SCREENS

HarmonySpace 5 on a 15.6" centre screen, running seven-screen collaboration across the cabin.

MATERIALS · COLOUR

Cabin grades are sold by name — Qiankun Max Luxury Cabin, Qiankun Ultra First-Class Cabin — with a welcome projection at the door.

SEAT · COMFORT

Power-adjustable third row in a 2+2+3 layout. Ceremony is engineered here, not implied.

WHO IT IS FOR

Business travel where the owner sits in row two and the car is part of the meeting.

LUXURY

HYPTEC A800

Flagship EREV sedan · pre-order Dec 2025 · the group's ceiling

HYPTEC A800

wraparound console, and the 27" W-HUD in the driver's eye line

SCREENS

"Interstellar Cockpit": wraparound console with a 10.25" cluster, 14.6" centre and a 27" W-HUD. HarmonySpace 5 on a flagship Qualcomm chip, 0.3 s response.

MATERIALS · COLOUR

A 6,536 mm ambient light run — claimed the longest in the world. Seamless wraparound surfacing with active noise cancellation.

SEAT · COMFORT

Eight-way power front seats with three massage modes.

WHO IT IS FOR

Premium technology early adopter. Huawei Qiankun ADS 4 Ultra, with L3 on the highway.

FLAGSHIP

TRUMPCHI + HYPTEC — one recipe, seven cars

WHAT THE BOARD ABOVE ADDS UP TO

- Comfort is quantified and sold: recline angle, massage modes, screens per seat.
- Screens multiply rather than grow — cluster, centre, passenger, ceiling, armrest.
- Huawei is the cabin brand above ¥200k: HarmonySpace 5 and Qiankun ADS.
- Ceremony does the premium work — welcome projection, named cabin grades.
- The 27" W-HUD is the new flagship signature, not a bigger centre screen.

WHAT IT COSTS THEM

Cabin identity is increasingly Huawei's rather than Trumpchi's. Below ¥170k the interior story thins out fast — Emzoom and GS8 are a full generation behind their own flagship.

Image frames are intentionally empty — drop press photography in and the layout holds. — Sources: GAC / Trumpchi / Hyptec press material; Auto China 2026 and Auto Guangzhou releases; CarNewsChina; BitAuto; Gasgoo; CnEVPost. Compiled September 2026. Prices are China MSRP bands. Fields marked "not published" were not found in a primary or reputable secondary source — measure them on the vehicle.

What it means for us

The two boards read together: the design doctrines, the CMF and comfort ladders, the occupants GAC is drawing for, and where Changan's cabins actually stand.

DOCTRINE

What each brand believes a cabin is

AION

"Fashionable, intelligent, reassuring"

One screen, soft surfaces and colour. Design VP Fan Zhang frames it as "the aesthetics of man-machine symbiosis" — adapting to the occupant rather than impressing them.

SIGNATURE MOVES

One 14.6–15.6" tile · 32-colour ambient · named vegan-leather colourways · flat-fold bed mode · zero-gravity co-pilot

WHAT THE BUYER SEES FIRST

The colourway — seen from the pavement, before the door is opened.

TRUMPMCHI

"Family mobility"

Comfort you can count. The cabin is specified in numbers a buyer can repeat in a showroom: recline angle, massage modes, screens per seat.

SIGNATURE MOVES

Second-row captain chairs · zero-gravity leg rests · ceiling screen · welcome projection · Huawei HarmonySpace

WHAT THE BUYER SEES FIRST

The second row.

HYPTEC · AISTALAND

Premium tech

The cabin as an instrument. "Organic modernism" on Hyper GT, "Interstellar Cockpit" on the A800. Light and horizon replace trim as the luxury material.

SIGNATURE MOVES

27" W-HUD · wraparound console · 6,536 mm ambient run · 18-point massage · zero-gravity at 127.5"

WHAT THE BUYER SEES FIRST

The HUD horizon, before the seat.

"Form language lasts for one generation in China."

Fan Zhang, Vice President of Design, GAC — which is why the group renews cabin architecture on a roughly four-year clock and lets colour, not surface form, carry the model-year difference.

OCCUPANTS

The five characters GAC designs for

LIN

24 · Guangzhou · first car

ENTRY

¥70–110k

AION UT · AION Y PLUS

TOUCHES FIRST

The door card colour, from the pavement.

WHAT WINS THEM

Cream or dusky pink carried onto the dash. A cabin that folds flat for a weekend. Phone casting that works first time.

WHAT THEY WILL NOT FORGIVE

Hard shiny plastic where the elbow lands.

WEI

31 · new parent

MID

¥110–160k

AION N60 · AION i60

TOUCHES FIRST

The rear bench and the ISOFIX anchor.

WHAT WINS THEM

117–137° rear recline, 35 stowage points, wipe-clean vegan leather, a 2.38 m² roof over the child seat.

WHAT THEY WILL NOT FORGIVE

Climate buried three menus deep with a baby crying.

ZHAO

38 · small business owner

UPPER-MID

¥170–250k

TRUMPMCHI XIANGWANG S7 · S9

TOUCHES FIRST

The second-row leg rest, before the driver's seat.

WHAT WINS THEM

137° recline, six-mode massage, a 17.3" ceiling screen for the children, second-row climate control.

WHAT THEY WILL NOT FORGIVE

A third row an adult cannot sit in.

CHEN

46 · chauffeur-driven

LUXURY

¥250–400k

TRUMPMCHI M8 XIANGWANG · E9 · HYPTEC HL

TOUCHES FIRST

The 5" pad in the armrest.

WHAT WINS THEM

2+2+2, 18-point massage, zero-gravity at 127.5°, welcome projection, silence.

WHAT THEY WILL NOT FORGIVE

Having to lean forward to reach anything.

YU

33 · technology-first

FLAGSHIP

¥350k +

HYPTEC A800 · AISTALAND GT7 · AION RAY 7

TOUCHES FIRST

The HUD horizon, before the seat.

WHAT WINS THEM

27" W-HUD, wraparound console, a 6,536 mm light run, Huawei continuity from phone to car, L3 on the highway.

WHAT THEY WILL NOT FORGIVE

A cabin that reads the same as the ¥130k car one brand down.

CMF

Colourways actually on sale

Every swatch below is a shipping option, not a show car. AION names its interiors; Trumpchi names its seats.

Soft Light White

AION N60 · named theme

Caramel Warm Velvet

AION N60 · named theme

Morning Mist Cool Grey

AION N60 · named theme

Cream

AION UT seats, doors and dash · AION V option

Dusky Pink

AION UT · the boldest shipping colour in the range

Healing Green

AION Y Plus · briefed as urban stress relief

Also shipping: Tan (AION V genuine-leather option) · Suede grey (AION RT zero-pressure seats) · Black faux leather, the standard fit almost everywhere.

THE READ

AION has turned colour into the product. Three named themes per car means a model-year change can be a CMF change — cheap, fast and visible in a showroom photograph. Trumpchi has no equivalent naming discipline and loses that lever entirely.

COMFORT

What each price step buys

¥70–110k

AION UT

Fixed seats, manual recline. The differentiator is a flat-fold bed across the whole cabin, not adjustment.

¥110–130k

AION N60

Zero-gravity co-pilot seat standard. Front heating, ventilation, massage and memory. Rear backrest 117–137°.

¥115–160k

AION i60

"Eight-layer comfort sofa" fronts with 8-point massage; dual-tone split and 32-colour ambient.

¥170–250k

TRUMPMCHI XIANGWANG S7

Rear reclines to 137° on a zero-gravity cloud leg rest. Massage in six modes at three intensities. 17.3" ceiling screen.

¥250k +

HYPTEC HL · A800

2+2+2, second-row captain chairs, 18-point massage, 12-way power, zero-gravity at 127.5°. At the A800: 27" W-HUD, 6,536 mm ambient run, ANC, L3 on the highway.

THE LINE THAT MOVED

Massage and zero-gravity seating crossed below ¥130k in April 2026.

A zero-gravity front passenger seat was a ¥250k feature until the AION N60. It now ships on a ¥109,800 compact SUV that also carries LiDAR as standard — so every comfort assumption below ¥150k needs re-baselining against that car.

OUR POSITION

GAC against Changan — and what we do about it

DIMENSION	GAC · AION + TRUMPMCHI + HYPTEC	CHANGAN · NEVO + DEEPAL + AVATR	READ
Centre display	14.6" floor; 15.6" 2.5K on the newest (N60)	Nevo 15.7" 2.5K, Q05 15.6"; Deepal L06 15.6" adaptive	Parity. Screen size has stopped being a differentiator.
Cluster	Retained at 8.8–12.3" on almost everything	Nevo keeps 9.8–10.17"; Deepal L06 deletes it	We are ahead on deletion. Commit to it as a design position, not a cost saving.
Head-up display	27" W-HUD, flagship only (A800)	50" AR-HUD already at Deepal L06, mid-range	Our clearest lead. Push AR-HUD down into Nevo before Hyptec spreads theirs.
Ambient light	32 colours standard; 6,536 mm run at flagship	Present, not merchandised as a number	They made ambient a spec-sheet figure. Answer with a named light architecture, not a bigger number.
Seat comfort	Zero-gravity and massage below ¥130k; 18-point at premium	Strong at Avatr, thinner below ¥150k	The fastest-moving line on this board. Re-baseline the comfort budget now.
Cabin OS	ADIGO 6.0 on Aion; Huawei on Trumpchi, Hyptec, Aistaland	Huawei on Avatr; MediaTek MT8676 across Nevo	Both groups run dual-track. Our silicon choice is the cost lever — protect it.
CMF	Three named themes per car, refreshed per model year	Colourways specified, rarely named or storied	They sell colour as product. Ours needs names, a story and a launch moment.

SIX THINGS TO PUT IN THE NEXT INTERIOR BRIEF

- 1

Name the colourways. Three named themes per car is a cheap, visible model-year lever we are not using.
- 2

Re-baseline comfort under ¥150k. Zero-gravity and massage crossed below ¥130k in April 2026.
- 3

Defend the HUD lead — get AR-HUD out of Deepal L06 and into the Nevo Q-series before Hyptec spreads its 27" W-HUD.
- 4

Above ¥170k, design the second row first. Every Trumpchi over that line is sold on recline angle, leg rest and rear screen.
- 5

Do not chase screen count. Ours is one adaptive screen plus projection — and the switchgear GAC deleted.
- 6

Get a rear ceiling screen into the family plan. 15.6–17.3" ceiling displays are now standard above ¥170k.
